

FloorPro High Gloss Crystallising Agent, powder RM 775

Powder for wet crystallisation of calcareous floors made of marble, terrazzo and artificial stone. Crystallisation hardens the floor, increases its sturdiness and ensures a high gloss.

pH 1.4
in concentrate

Properties

- Effective high-gloss crystallising agent for all calcareous stone floors such as marble, terrazzo, artificial stone
- Powder
- Creates a hard-wearing surface by compacting the stone
- Creates a mirror-like high gloss
- The character of the stone is preserved
- Makes future cleaning of the surface easier (less resoiling)
- Extremely economical
- Can be walked on immediately after application
- NTA-free

Usage options

- Single disc machines

Application areas

Car dealership and garage	Calcic stone floors
Building cleaning	Calcic stone floors
Hotels, gastronomy, catering	Calcic stone floors
Municipal	Calcic stone floors
Retail	Calcic stone floors

Container sizes	Packaging unit	Part number
5 kg	1 Piece(s)	6.295-117.0

Application

Single-disc machines - crystallising

- Clean surface thoroughly.
- Rinse with plenty of clear water and soak in water until all dirt and cleaning agent residues have been removed.
- Leave to dry.
- Set up the device with the appropriate pad.
- Mix approx. 30 g of powder/m² with 90 ml of water into a paste.
- Per m², distribute paste evenly over the surface with a pad.
- Polish surface immediately with device until a high-gloss is achieved.
- Brush off the crystallising agent from the surface with plenty of water and standard brushes.
- Vacuum surface with wet and dry vacuum cleaner.

Instructions for use

- Test on an inconspicuous part for material compatibility.
- Fine grind any heavy wear and scratches on the floor before treatment.
- Store in a dry place.
