NRV370-22

## NRV370-22 NRV380-22

Professionals being exactly that, take the time to consider each and every feature of a machine in making their preferred choice and this decision-making is even more pronounced in the NRV-370 and 380 series which, by virtue of being 66% greater in capacity, will end up working longer hours... day in day out.

The NRV-370 is the big brother to the NRV-200 with the same superb Twinflo' power and performance; Hi/Lo operation; 12.5-metre cable system, but with an additional 66% capacity... a full commercial standard.

The NRV-380 is the smallest model in our range to be supplied with its own Structofoam container... this, in itself, is warranted for 3 years and can take a beating 24 hours a day if necessary. Structofoam is an exclusive Numatic formulation providing unrivalled strength and impact qualities, without suffering a weight penalty and used extensively throughout our bigger machines.

*Two machines... both 15 litre capacity; one truly professional and one heavy-duty professional... the choice is yours.*
